Try for \$5/month

This is made possible by LayerZero V2, which enables applications to batch their cross-chain message so that users only need to pay an amortized portion of the total transfer cost. With Stargate V2, users can now choose to utilize this batching feature where they will only need to pay their share of the fees, but will need to wait for the batch to fill up before their transaction will be processed. Guaranteed finality persists. The option to pay the fees in full will also still be available if a user does not wish to wait.

As the fastest, most secure and affordable native asset bridge, Stargate will play a key role in enabling the growth of a vibrant DeFi playground in the Klaytn and future Kaia ecosystem. [Try out Stargate V2](#) now and see how it can supercharge your DeFi experience on Klaytn today.
